## IC REFRIGERATION

Exhaust Hood Filters

Pro Tip

Product Feature

**DID YOU  
KNOW?**

We manufacture and sell trash cans. The TE-35 is the easy and attractive way to collect trash and keep unwanted guests from rummaging inside.

*Call today to redeem 10% off your order (over \$100 in savings!)*

# TE-35

## HOOD FILTERS YOUR FIRST LINE OF DEFENSE

Hood filters reduce the buildup of flammable residue in the ventilation system. By doing so, the filters minimize the risk of dangerous kitchen hood fires. However, only regular cleaning and replacement can maintain the effectiveness of hood filters.

Soaking your kitchen hood exhaust filters nightly or even every other night, can help your hood system

ventilate better and in turn save you on energy costs. This process also ensures you are removing unnecessary grease build up which can be a major fire hazard.
